# Harsh Rai

## Java Backend Developer

### PROFESSIONAL SUMMARY

Highly motivated and detail-oriented Java Backend developer with a robust foundation in coding, backed by 1200+ hours of hands-on experience. Proficient in Java, Spring Framework, and relational databases. Demonstrated ability to excel in both independent and team-oriented project environments.

### PROJECTS

#### 1. Green Garden | 🌱

Java | MySQL | Spring Boot | Hibernate

- Developed an online plant nursery platform named Green Garden using Java, MySQL, Spring Boot, and Hibernate.
- Implemented user and admin registration and authentication features for secure access.
- Managed CRUD operations for the nursery and orders, ensuring seamless data management.
- Handled tasks related to items, categories, and billing for efficient e-commerce functionality.

#### 2. Fly Trip Travel | 🌐 | 🌱

Java | MySQL | Hibernate | Maven

- Developed an online flight booking system.
- Implemented features like filtering, sorting, admin page, view cancelled bookings, and soft delete functionality.
- Designed a secure login and signup system.
- Managed the Java, Spring, Hibernate, and MySQL tech stack.
- Took responsibility for creating the Customer and Category modules.
- Handled all exceptions, validations, and maintained the project's GitHub repository.
- Completed this individual project in just 5 days.

#### 3. Alliance Digital | 🌐 | 🌱

HTML5 | CSS3 | JavaScript

- Collaboratively built an e-commerce website called 'Alliance Digital'.
- Implemented features like login and signup pages, responsive design for mobile and laptop, filtering, sorting, and an 'Add to Cart' functionality.
- Admin page for managing the website's content.
- Developed by a team of four members in a short timeframe of 5 days.
